The Scientific Article in the Age of Digitization Oct 31 2022 This book outlines the consequences of digitization for peer-reviewed research articles published in electronic journals. It is argued that digitization will revolutionize scientific communication. However, this study shows that this is not the case where scientific journals are concerned. Authors make little use of the possibilities offered by the digital medium; electronic peer review procedures have not replaced traditional ones, and users have not embraced new forms of interaction offered by some electronic journals.

Articles 43-45 Feb 08 2021 This volume constitutes a commentary on Articles 43-45 of the United Nations Convention on the Rights of the Child. It is part of the series, "A Commentary on the United Nations Convention on the Rights of the Child," which provides an article by article analysis of all substantive, organizational and procedural provisions of the CRC and its two Optional Protocols. For every article, a comparison with related human rights provisions is made, followed by an in-depth exploration of the nature and scope of State obligations deriving from that article. The series constitutes an essential tool for actors in the field of children's rights, including academics, students, judges, grassroots workers, governmental, non- governmental and international officers. The series is sponsored by the "Belgian Federal Science Policy Office,"

The Myth of the Zero Article Jul 28 2022 The zero article is a staple element of any description of English article usage from advanced research publications down to student grammars, but there has been very little inquiry into its meaning and its other properties. There are copious amounts of publications dealing with the definite and indefinite articles but none about the zero article. Berezowski investigates the origin of the concept of the zero article and shows that it has roots both in structural linguistics of the 1940s and earlier historical linguistics. Structural linguists went on to claim that, since the use of articles in English is deemed 'obligatory', the zero article exists but it has no overt form. Looking through earlier attempts at analyzing the meaning of the zero article, from Jespersen to Chesterman, Berezowski shows how they all fail. An answer to theoretical problems of grammaticalization are developed; it is shown that English articles have not yet reached a stage in their development where their use has spread to all grammatical environments. Thus, a model is developed for determining when there is no article in English. The new model is tested against a commonly occurring case of zero article, using a corpus-based approach. The Myth of the Zero Article will appeal to academics and students interested in grammar and syntax. It covers an issue recurrent in the teaching and learning of English as Second/Foreign language, and will also appeal to teacher trainers and trainee teachers.
